ITI plans to invest ₹700 crore in data centre business

In talks to host Amazon on its data centre

VENKATESH GANESH

Bengaluru, May 30

After a rebound in its fortunes, public sector company IIT Limited has lined up plans to stay on the profitability path, by expanding data centres, manufacturing 3D-printed products, adding employees and a follow-on public offer.

The state-run electronics company, which was in the red till recently, saw a turnaround in its fortunes and returned on the profitability path, on the back of government projects, coupled with work from some private companies. The company is also in talks with Amazon to host some of their technology on its data centre.

With this momentum, IIT plans to pump in ₹700 crore as a part of its in its data centre business. "This is a first step towards the 1000-mile journey and we are confident of breaking even in the next 3-4 years," S Gopu, Chairman and Managing Director, IIT, told *BusinessLine*. This data centre provides services such as hosting emails, surveillance and managing technologies remotely, which are similar to the ones provided by private providers. Apart from expansion of Bengaluru data centre, it plans to launch a new one in Uttar Pradesh.

For 16 years, IIT, which was declared sick, took government help to put its business back on track. These efforts included discarding older businesses (such

Upbeat S Gopu, Chairman and Managing Director, IIT Limited

as manufacturing of landline phones) but focussing on new areas such as laying optical fibre network for BharatNet, communication technologies for Defence, hosting IT infrastructure and building capabilities in data analytics by partnering with start-ups. All this resulted in a profit of ₹102 crore for 2017-18.

Defence projects

"Our order book is ₹12,000 crore, of which ₹10,000 crore has come from Defence projects," said Gopu.

Company executives said that it won these projects amongst bids placed by competitors such as BEL, RailTel and Sterlite. Around 60-70 per cent of its business comes from the government and the data centre expan-

sion is seen as an effort to work on existing government projects and new one from the private sector.

In 2014, IIT got a ₹4,156-crore package from the Indian government. Also, grants, which are classified under other income at the end of March, were ₹1,647 crore. In March, the Cabinet cleared selling of 18 crore equity shares of IIT through a follow-on public offer in August, which will help the PSU meet the minimum 25 per cent public shareholding norm and reduce its debts.

The company, which currently has 3,450 employees, plans to add another 2,000 in three years. It has partnered with start-ups such as Cardiac Design Labs, Yuktit Technologies and Citrus Platform Solutions.

ITI eyeing FPO in July-August

Bengaluru: Public sector firm ITI Ltd is targeting to come out with a fresh issue of shares through a follow-on public offer (FPO) between coming July and August, its chairman and managing director S Gopu said.

"The Cabinet Committee on Economic Affairs was very kind enough to approve a proposal to allow us to offer 18 crore fresh issue of shares to public through FPO in domestic market. Our aim is to come out with fresh issue of shares between July and August," he said.

The government currently holds 92.59% stake in ITI, he said.

"We are hopeful it (FPO proceeds) will be used for very important projects like Bharat Net, Data Centres and several IoT programmes," he added.

The FPO will also help ITI reduce its debt obligations and meet Sebi's requirement of minimum 25% public shareholding, Gopu said.

FPO is a stock issue of additional shares made by a company that is already publicly listed and has gone through the initial public offering process.

The ITI chief also announced an expansion of the company's data centre facility by adding 1,000 additional racks in the existing set up here and setting up of new data centre of 200 racks capacity at its Naini plant. —PTI

ITI ramps up Bengaluru data centre

Bengaluru: Public sector undertaking ITI Ltd on Tuesday announced the expansion of its data centre in the city with the addition of 1,000 additional racks, which will allow government departments and other clients using cloud computing to store all data within the country. The Government of India has issued strict guidelines stating that all government-owned bodies using cloud computing must store the data within the country and the ITI's move will cater to these requirements. In addition, a new data centre with 200 racks to will be set up to house network infrastructure. On the occasion, S Gopu, ITI chairman and managing director, said, "With this increased capacity, the ITI data centre will be one of the biggest PSU data centres in India. Many organisations have already shown interest in hosting their data with ITI Ltd."

TELCOM GIANT ITI ANNOUNCES EXPANSION

PC BUREAU
BENGALURU, MAY 29

India's premier telecom manufacturing company ITI Ltd. has announced the expansion of its data center facility by adding 1000 additional racks in the existing set up in Bangalore.

The company also set up a new data center of 200 racks capacity in its 5th floor in Ahmedabad. The new infrastructure will enable PSU, Banks, Central & State Government, industries, IISs, MNCs, corporates and large enterprises to have their data hosted within the country.

ITI Ltd., the company which was its financial success for last 10 years has turned green and has declared profit of its net cost during fiscal 2017-18.

H. Gupta, Chairman and Managing Director of ITI Limited said, "ITI has been in the data center business for last 10 years with renowned customers like public sector banks, financial institutions, PSUs, corporates and other government agencies. ITI is enhancing its data center services and the new data center with 1000 racks added in Bangalore and 200 racks space in Ahmedabad has been an ambitious expansion plan of ITI which is getting materialised now. With this enhanced capacity ITI data center will be one of the biggest PSU data centers in India. We are very happy to note that many organizations have already shown interest in hosting their data with ITI Limited. This data center expansion exhibits ITI's deep commitment to the Government of India's flagship initiatives like 'Digital India, Make in India and Smart City'."

Addressing a media conference here on Tuesday Gupta said the city has been designed to provide a wide range of offerings that includes Managed Co-location Service, Managed Dedicated Service and Cloud Service. In a Managed Co-location Service the company will offer a Tier-3 Data Center facilities with highly reliable and secure physical infrastructure including power and necessary cooling with state-of-the-art fire detection & suppression.

ITI'S STATE-OF-THE-ART Data Center is currently spread over more than 2,00,000 sq. ft. with world class facilities

ITI ramps up data centres

» ITI Limited on Tuesday expanded data center facility in Bengaluru and Naini in Uttar Pradesh with a total investment of Rs 200 crore, reports *DHNS* from Bengaluru.

The expansion will help the company add 1000 additional racks in the existing set up in Bengaluru and setting up of a new data centre of 200 racks capacity in its Naini Plant, ITI CMD S Gopu told reporters.

He said that the company has been in the data

center business for last 10 years with renowned customers like public sector banks, financial institutions, PSUs, corporates and other government agencies.

“ITI is enhancing its data center services and the new addition is the company’s aggressive expansion plan to become a market leader in this space. With this increased capacity ITI data centre will be one of the biggest PSU data centers in India,” he said.

ITI cashes in on Data Centre operations, expands significantly

Bengaluru, May 29 (UNI) Boasting one of the most modern and secure Data Centre, State owned Indian Telephone Industries (ITI) on Tuesday launched the second phase of its Data Centre with an ambitious target of 1200 racks, including 200 racks in its Naini unit with a total investment of Rs 200 crore.

Talking to newsmen here ITI Chairman and Managing Director S Gopu said that ITI was already operating a Data Centre currently with 350 racks, that was set up nine years ago.

It was fully saturated and hence the expansion programme had been taken up with 150 racks made functional today.

Before September end the entire expansion project would be complete, he added.

Bengaluru | Tuesday, May 29 2018 IST

Boasting one of the most modern and secure Data Centre, State owned Indian Telephone Industries (ITI) on Tuesday launched the second phase of its Data Centre with an ambitious target of 1200 racks, including 200 racks in its Naini unit with a total investment of Rs 200 crore.

Talking to newsmen here ITI Chairman and Managing Director S Gopu said that ITI was already operating a Data Centre currently with 350 racks, that was set up nine years ago. It was fully saturated and hence the expansion programme had been taken up with 150 racks made functional today. Before September end the entire expansion project would be complete, he added.

He said nearly 60 per cent of the clients for the Data Centre was from the government, both at central and state level and ITI was also hosting data of a most critical department of the Centre besides Aadhar authentication facility for Gujarat government. The Company was also planning to set up a Data Recovery Centre in Allahabad.

He said ITI which had turned green after a gap of 12 years last fiscal with a net profit of Rs 102 crore aimed to wipe off the accumulated loss of Rs 4195 crore over the next three to four years. The current order book stood at Rs 2000 crore and over the next couple of months it would increase to around Rs 15,000 Crore. It had also tendered for projects to the tune of Rs 20,000 crore.

He said the Company would, this fiscal, offer nearly 180 million shares to public to keep in tune with the SEBI guideline of offering 25 per cent shares to public. Currently the public holding was only 6.25 per cent.

ITI eyeing FPO in July-August: Official

Bengaluru, May 29 Public sector ITI Limited is targeting to come out with fresh issue of shares through a follow on public offer (FPO) between coming July and August, its Chairman and Managing Director S Gopu said today.

"The Cabinet Committee on Economic Affairs was very kind enough to approve a proposal to allow us to offer 18 crore fresh issue of shares to public through FPO in domestic market. Our aim is to come out with fresh issue of shares between July and August," he told Gopu told PTI here.

The government currently holds 92.59 per cent stake in ITI, he said.

"We are hopeful it (FPO proceeds) will be used for very important projects like Bharat Net, Data Centres and several IoT programmes," he added.

The FPO will also help ITI reduce its debt obligations and meet Sebis requirement of minimum 25 per cent public shareholding, Gopu said.

FPO is a stock issue of additional shares made by a company that is already publicly listed and has gone through the initial Public Offering process.

The ITI chief also announced expansion of the company's data centre facility by adding 1,000 additional racks in the existing set up here and setting up of new data centre of 200 racks capacity at its Naini plant.

ITI ramps up data centre footprint

ITI Limited on Tuesday expanded data centre facility in Bengaluru and Naini in Uttar Pradesh with a total investment of Rs 200 crore.

The expansion will help the company add 1,000 additional racks in the existing set up in Bengaluru and setting up of a new data centre of 200 racks capacity in its Naini Plant, ITI CMD S Gopu told reporters.

ITI Limited Chairman and Managing Director S Gopu said the company has been in the data centre business for the last 10 years with renowned customers like public sector banks, financial institutions, PSUs, corporates and other government agencies.

"ITI is enhancing its data centre services and the new addition is the company's aggressive expansion plan to become a market leader in this space. With this increased capacity ITI data centre will be one of the biggest PSU data centres in India,"he said.

The company's new initiative comes further to the guidelines issued by the government on

ITI Ltd to expand data centre capacity

By Ayan Pramanik, ET Bureau | May 29, 2018, 10:10 PM IST

The company's Data Center is currently spread over more than 200000 Sq. ft. area.

BENGALURU: Public sector telecom equipment maker ITI Ltd [NSE -1.31%](#) said it would expand its data centre capacity by adding 1000 racks to the existing facility in Bangalore and setting up a new 200-rack storage near Allahabad.

The company's data centre expansion is in line with the guidelines issued by the Indian government for storing all departmental data within the country.

This expansion of the facility by ITI, which provides data center [infrastructure NSE 1.92%](#) and managed services, will give enterprises in the government and corporate sector an opportunity to serve their customers and end-users better.

ITI Limited Ramps Up Data Centre Footprint, Takes A Giant Leap Towards 'Digital India' Initiative

- › Adds 1000 additional racks in its Bengaluru facility
- › Sets up a new Data Centre of 200 racks in Naini Plant
- › This will serve the fast-growing demand from Indian businesses and offer benefits of the next generation facilities and services to help customers achieve the safest and secured architecture for the hosted infrastructure

Bengaluru, May 29, 2018: ITI Limited, country's first PSU post-independence and premier telecom manufacturing company today announced the expansion of its data center facility by adding 1000 additional racks in the existing set up in Bengaluru and setting up of a new Data Centre of 200 racks capacity in its Naini (Allahabad, UP)

Plant. This announcement comes further to the guidelines issued by the Government on setting up of IT infrastructure by government departments using cloud computing technology with a clause mandating that all data must be stored within the country. The new infrastructure will enable PSU Banks, Central & State Government undertakings, MNCs, corporates and large enterprises to have their data located within the country.

This expansion of the facility by ITI Limited will give enterprises in the government and corporate sector an opportunity to serve their customers and end-users better while being able to compete with the private players on an even keel. With greater proximity to high-speed networks and other services,
